Angular 2/4/5/6
Node.js, Express
Webpack, Gulp, Bower
MongoDB, Mongoose
mySQL, SQLite, PostgreSQL
Ruby, Ruby on Rails, Sinatra

EDUCATION

The Ohio State University

Columbus, OH

Human-Computer Interaction

Personalized Study Program based on curricula at Stanford, Berkeley, UWash, and CMU

PERSONAL PROJECTS

Locker.

MEAN Full Stack with a custom [Chrome Extension](#)

Online locker to store anything a users wants via Embedly including videos, articles, images, etc.

Rendezvous

Ruby Full Stack with Rails and PostgreSQL

An itinerary creator that allows users to set their itineraries as private or public, enabling collaboration with friends, making planning group travel easier.

Timeline

Javascript Full Stack (MongoDB, Express, Node.js)

Activity and location tracker; gives user visual account of where he spends most of his time throughout his week or month. Uses W3C Geolocation API and Google Maps API with Socket.io.

HACKATHONS

AltU / GiveBackHack 2016

An online web portal to guide High School students in exploring alternative career paths by connecting them with companies who care.

Role: Team Lead; developed an online web portal using Ruby and Ruby on Rails.

Community Capital / GiveBackHack 2015

Co-created an alternative to predatory payday lenders through a community-based short term lending program.

Role: Began UX/UI development of a streamlined, user-friendly web portal for loan

Catalyze Columbus / Startup Weekend 2015

Matched nonprofits in need of services with talented artists and designers.

Role: Led design and usability discussions, created wireframes, and paper prototypes to guide dev team.

EXPERIENCE

FINDMINE / Front End Developer and Scrum Master

New York, NY / Jul 2017 – Present

Led all customer implementations, created mocks and high fidelity prototypes for sales demos, and led development on FINDMINE's internal Admin tool as it was rebuilt and enhanced using Angular 6; knowledge of UI/UX concepts was critical to increase overall usability of the product.

Owned the entire SCRUM process as Scrum Master, continually worked with VP of Engineering and Head of Product to smooth out procedure and workflow whenever possible, including overhauling internal communications and remote meeting expectations.

Core-apps / Contract Front End Developer

Remote / Feb 2014 – Sep 2017

Began as a Quality Assurance Internship focused on designing comprehensive testing methodologies for everything from mobile/web apps to backend administrative and database functionality; promoted to a front end developer focused on creating informational HTML/CSS screens for clients involving jQuery interaction and animations.

Freelance / Web Developer

New York, NY / May 2017 – Jun 2017

Two-month-long implementation of a complete redesign of a solar energy exchange website, involving complete HTML restructuring and all new CSS styling while utilizing existing AngularJS code to create new and improve existing functionality where necessary.

Digiday Media / Web Developer

New York, NY / Feb 2016 – Apr 2017

Managed the continued development of [Digiday.com](#), led all development of [Glossy](#) and [Tearsheet](#), Digiday's latest verticals. Each used an uncoupled CMS with Node/Express middleware and an AngularJS front end. Eye for design, passion of UX, and knowledge of best coding practices was critical for everyday work.

General Assembly / Web Development Immersive

New York, NY / Sep 2015 – Dec 2015

Three months of intense, experience-based work in some of the most important languages used today. Built many web apps from scratch including a JavaScript web game, a Full Stack Rails app for creating and sharing travel itineraries, and a MEAN Stack app for saving articles, images, and videos via a Chrome Extension.
